

Environmental Policy 2017
SILVADEC – Plant : ARZAL (56)

When it was created, Silvadec was supported by the ADEME (Environment and Energy Management Agency). By offering products with characteristics similar to those of exotic woods, Silvadec helps to reduce massive deforestation and thus contributes to the preservation of tropical forests.

The company Silvadec is PEFC certified. This European label guarantees consumers that wood or wood products with this label come from sustainable managed forests.

Silvadec confirms its commitment to compliance with environmental regulations and continuous improvement of its environmental practices and performance, with its environmental management system. Since March 14, 2014, Silvadec is the first independent manufacturer of wood composite certified ISO 14001 in Europe.

ISSUES	ORIENTATIONS 2017
Image : Optimize Silvadec's image	Improve our Environmental Management System (EMS).
Sales : creating a competitive edge and anticipating our customers' future environmental expectations.	Obtain the renewal of our ISO 14001 certification. Prepare for the transition to the 2015 version of the standard, with particular emphasis on eco-design and the product lifecycle: Launch of the recycling program ECO-BOX: "Turn your scraps into a terrace" .
Environnemental : Contribute to the global environmental approach	Protect the environment and reduce all of our impacts, including those of our suppliers. Target concrete and realistic actions to reduce the carbon footprint of Silvadec; For 2017: <ul style="list-style-type: none"> • Increased use of recycled polyethylene: <ul style="list-style-type: none"> ○ ORPLAST device. ○ Optimize power consumption for drying granules.
Environnemental : Provide formal recognition on the voluntary approach.	Obtain renewal of our ISO 14001 certification and communicate on environmental aspects.
Organisation : Structuring the operation by building an EMS with the aim of building a SMI (Integrated Management System) in the future.	Ensure the proper functioning of the Environmental Management System (EMS) according to the ISO 14001 standard.
Workforce : Strengthen teams' pride in a common unifying theme.	Involve the teams in the EMS, inform them about the actions carried out and, train / sensitize newcomers.
Coherence : Ensure the link between commercial communication and environmental actions.	Ensure that any environmental announcement are based on real foundations.
Economy : Contribute to the optimization of the operating account.	Look for gains on all environmental aspects
Conformity	Respect legal and other environmental requirements.

I pledge to give to the workforce the means to achieve the goals set and on the implication of each one for the success of our environmental approach,

Arzal, the 15th of December 2016 (*Abrogate la version du 10 Décembre 2015*).

Bénédicte Jézéquel
